MONKEYGOD

ADVANCED TRICKS.

Nine systems. One guide. Run them together.

-
- Instant Unban System — works unlimited times, every device
 - Unlimited Swipes APK — jailbroken Monkey access
 - Girls-Only Filter — auto-skips males on Omegle
 - Algorithm Hacking — get matched with the best users
 - Social Engineering — conversation mastery from zero
 - The Script Pack — openers, hooks, escalation lines, exits
 - Advanced Ban Avoidance — the complete AI evasion framework
 - Peak Hours & Best Times — the windows that triple results

These are not separate tricks — they are layers of the same operating system. Run them together and results compound. Run one in isolation and you leave 90% of the value behind.

01 —

INSTANT UNBAN SYSTEM

Omele and OmeTV do not store account information or track device fingerprints. They ban one thing only: your IP address. Three steps. Works unlimited times.

1

Get a VPN or Proxy

A VPN replaces your IP with one the platform has never seen. Recommended: Surfshark (~\$2.50/mo) — fast, reliable, unlimited devices. Free option: Proton VPN.

2

Verify Your IP Changed

Go to whatismyip.com with the VPN connected. Confirm the IP shown is different from your real one. If unchanged, you are not connected correctly.

3

Return to the Platform

The platform sees a brand new IP — a user it has never encountered. Your ban is instantly gone. Works on PC, iOS, and Android. Every ban reason. Unlimited times.

RECOMMENDED VPNs: Surfshark · NordVPN · ExpressVPN. IP verification: whatismyip.com

02 —

UNLIMITED SWIPES — THE APK METHOD

The standard Monkey App limits swipes and filters. The APK method runs a modified version that removes the swipe cap and expands filter access. Works natively on Android. iOS and PC require additional setup but are fully achievable.

1

Get the Monkey APK

Download the modified Monkey APK from [APKMirror](https://APKMirror.com). Use Monkey v7.41.0 — the version with swipe and filter restrictions removed.

2

Install the APK

Android: enable "Install from Unknown Sources" in security settings, then open the file and install normally. iOS: follow the XAPK/APK install guide at apkpure.net/how-to/how-to-install-xapk-apk.

3

Run With This Guide

Unlimited swipes with no strategy is unlimited wasted time. Use Sections 04–05 of this guide to direct that access effectively.

NOTE: If the APK does not work on your device, contact monkeygod.us. A free Monkey Guide will be provided as a backup.

03 —

GIRLS-ONLY FILTER — OMEGLE

Omele has no built-in gender filter. This method adds one using a Chrome extension that reads gender recognition data from the video feed and auto-skips male connections in real time. Result: 95%+ female matches.

1

Download Chrome

Extension runs in Chrome on desktop. Mobile: Firefox (Android) or Yandex/Orion (iOS).

2

Install the Extension

Desktop: Chrome Web Store — search "Videochat Extension IP Locator". Firefox Android: Firefox Add-ons. Demo version is free and fully functional.

3

Configure the Gender Filter

Open your platform. Click the group emoji icon in the extension box. Set: Ban Men → ON. Skip Men → ON. Skip Women → OFF.

4

Set Recognition Parameters

Gender Confirmation: 1000ms. Threshold: 60%. Confirm: 1d (lowest). These settings balance speed and accuracy.

5

Refresh and Run

Refresh the tab. Filter is now active. Expect 95% female matches consistently.

04 —

ALGORITHM HACKING

Monkey App's matching algorithm is not random. It factors account history, social connections, and geographic proximity. These methods manipulate all three.

METHOD 1 — THE BAN POOL HACK (REQUIRES MONEY)

Create a new account and buy Premium. Get banned intentionally. Then unlock the account using 600 tokens. This places you in the match pool for users who have also been banned and unlocked — the most active and uninhibited users on the platform.

METHOD 2 — THE FRIEND NETWORK HACK (FREE)

Sign up, buy Premium, and go to your match history. Add every person in it as a friend. Monkey's algorithm prioritizes

matching you with people your connections are talking to. This compounds permanently — a larger friend network means better matches indefinitely.

METHOD 3 — VPN LOCATION SPOOFING (EVERYONE)

Get a free VPN. Connect to a location with high platform activity and a favorable demographic. The algorithm factors geographic proximity heavily. Spoofing your location places you in higher-activity match pools without changing anything about your account.

STACK ALL THREE: Ban pool positioning + friend network expansion + VPN location spoofing = maximum algorithm advantage. Premium strongly recommended for all three.

05 —

SOCIAL ENGINEERING & CONVERSATION MASTERY

Unlimited access and perfect matching mean nothing if the conversation dies in thirty seconds. Social engineering is the skill that converts matches into results. Learnable. Repeatable. Compounds with practice.

YOUR NAME IS YOUR FIRST IMPRESSION

Do not use a sexual name. Use a real name or a conversation starter — something that makes people curious rather than uncomfortable. The name is the first thing they see. A sexual name scares away 99% of the people you actually want to talk to.

THE ESCALATION LADDER

Start with deep personal questions to build investment. Move to physical questions to shift toward the body naturally. Once comfortable, shift to specific positive reinforcement. From comfort, the ask becomes natural rather than forced.

CALIBRATED WINS. The girls who show content have no trouble getting attention. They show for the guy who is not obviously chasing them. Interested but not desperate. The moment you seem thirsty, you become one of a hundred thirsty guys they already skipped today.

06 —

THE SCRIPT PACK

Tested, ready-to-use lines across every stage of a conversation. Use as-is or adapt to your own voice. Rule: short, simple, confident.

STOP-THE-SKIP HOOKS — First 3 seconds

- › "yo wait — quick question"
- › "don't skip this is actually funny"
- › "hold on 2 seconds"
- › "i need your opinion real quick"

CURIOSITY HOOKS — Make them lean in

- › "i'm testing something right now"
- › "you're actually perfect for this"
- › "this is gonna sound weird but"
- › "i've been asking people this all day"

DEEP OPENERS — Build real investment

- › "have you ever cheated in a relationship?"
- › "when's the last time you got your heart broken?"
- › "how high can you jump?"
- › "have you ever fought somebody?"

KEEP THEM ENGAGED — Mid-conversation

- › "nah that's actually interesting"
- › "wait explain that"
- › "you seem chill fr"
- › "lowkey didn't expect that answer"

EXIT LINES — Leave on a high note

- › "alright i gotta run but you're cool"
- › "that was actually fun"
- › "good talking to you"

07 —

ADVANCED BAN AVOIDANCE

The ban system is AI-driven. It fires on pattern recognition — visual triggers, motion signatures, text input. Every rule below targets a specific detection mechanism.

CLOTHING & VISUAL

- ✓ Wear dark clothing — black specifically. Reduces skin-tone contrast the AI uses to isolate exposed regions
- ✓ Cover with blanket, tight shorts, or boxers — covered items read ambiguously to the AI. Uncovered ones do not
- ✓ Avoid the stomach and abs — largest skin surface, easiest detection zone

CAMERA & MOVEMENT

- ✓ Set up the camera on a fixed surface — do not hold it. Handheld = shakiness = ban
- ✓ Find a locked angle before the session starts and do not change it
- ✓ Slow, deliberate movements only — fast motion flags as evasion on most detection models

LIGHTING

- ✓ Dim ambient lighting — not pitch black, but dim and directional
- ✓ Avoid ring lights and overhead brightness — perfect contrast helps the AI, not you
- ✓ Dark clothing + dim lighting together is the strongest passive defense combination

TEXT & ACCOUNT

- ✓ Do not type explicit words in chat — NLP runs on text parallel to video detection
- ✓ A combined text + video trigger dramatically increases ban probability
- ✓ Keep account name clean — nothing sexual. It is checked when reports accumulate
